

# Innovative Parts Cart Options • Assembly Instructions

## Parts Pan

Install Pan Hooks using supplied 1/4" nut, bolt and washer. Note: both V-hooks point in the same direction.

V-hooks can be used on any shelf. Slide up through basket and then sideways to lock in place as shown. When nesting carts, store Parts Pan on upper frame support.

## Folding Basket

Install Basket using supplied hardware. Front of Basket can be folded down for easy parts loading and unloading.

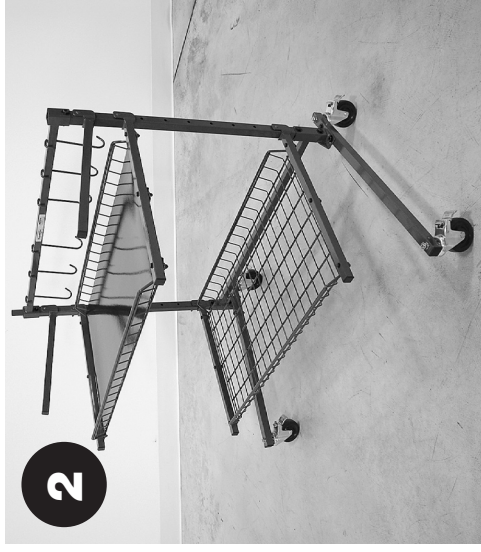

When nesting carts, basket is folded down and held in place with attached spring clips. Baskets should be used on the lowest shelf.

## Shelf Mat

For best results, set shelf on table. Remove upper rails. Place Mat on shelf and install rails using supplied 1-3/4" bolts.

The Shelf Mat makes a great work surface. It can be installed on any shelf, and nests like a normal shelf.
